

30 UGC transformation clips — 10 seconds each

Thirty testimonial-style clips built on one story shape: **someone was losing, they used BullionEdge Pro, now they keep what they make.**

Each clip is a full build, not a prompt: an Omni Flash A-roll brief showing the person actually using the platform, a B-roll list split into what the generator makes and what you record off your own screen, a **frame-accurate edit table** with transitions, SFX and infographic cues on every cut, a music bed with its lift placed on the payoff beat, a word-counted voiceover, a named psychological close, and captions for TikTok, Instagram, Facebook and YouTube.

This is a *different set* from [SOCIAL-UGC-30-DAY.md](#). That one demonstrates features. This one shows people changed by them. Run them in parallel — feature clip Monday, transformation clip Thursday — or run this set alone for thirty days.

Site link, in every description: <https://bullionedgepro.github.io/bullionedge-pro/>

The line you cannot cross, and why crossing it costs you money

No profit claims. No numbers. No P/L screens. No win rates.

Not because it is timid — because it is the version that survives and the version that sells:

1. **Meta and TikTok reject finance creatives with income claims.** Not sometimes. Your ad account is the asset; a rejected video costs a day, a flagged account costs the campaign.
2. **Every scam in this niche opens with a number.** Your prospect has been burned by four of them. A number puts you in that pile in under a second. Refusing to show one is the single cheapest way to sound different.
3. **The product contradicts you if you lie.** The app's whole pitch is that it refuses to guarantee anything. A customer who watched a profit promise and then met an app that says "no trade" feels tricked on day one and refunds on day two.

So what do these clips claim instead? The three things that are true, legal, and hit harder:

INSTEAD OF	SAY
"I made \$4,000"	"I stopped giving it back"
"90% win rate"	"I take four trades a week now, not twenty"
"Guaranteed profits"	"My account is still here"

"I stopped blowing accounts" is a stronger hook than "I made \$4,000", because the first one is the viewer's actual problem and the second one is a stranger's lottery ticket.

Production baseline

SETTING	
Ratio	9:16, 1080×1920, 30fps
Length	10s — that is 22–26 spoken words, counted, not estimated
Look	Phone camera, handheld, natural window light. A tripod reads as an advert
Text	Typed in post. Never let the generator render letters — AI text on a finance video reads as fake in one frame
Captions	Burned in. Assume 85% watch muted
Structure	0–2s face + problem · 2–6s the change · 6–8.5s the result · 8.5–10s the hook

House realism block — paste ahead of every prompt

Authentic user-generated content, vertical 9:16, shot on a modern smartphone front camera, handheld with natural micro-shake, no stabiliser. Real unretouched skin texture, natural pores, slightly uneven lighting from a nearby window. Ordinary lived-in room, mild background clutter. No studio lighting, no colour grade, no lens flare, no bokeh filter, no cinematic letterboxing. Person speaks directly to the phone, natural conversational pacing with small imperfections. Absolutely no on-screen text, no letters, no numbers, no logos, no watermarks, no user-interface graphics anywhere in frame. 10 seconds, single continuous take.

The kit — read once, referenced by all thirty

Every clip below is written as **A-roll + B-roll + edit table**. The A-roll is the only thing Omni Flash generates. Everything else is captured, or added in post. This is what keeps the clips looking real instead of looking rendered.

What the generator makes, and what it must never make

SOURCE	
A-roll — the person, the room, the delivery	Omni Flash
B-roll (environment) — hands, desk, street, weather	Omni Flash
B-roll (screen) — the app, the checklist, the journal	Your real screen recording. Never generated
Text, numbers, infographics, logos	Typed by you in post. Never generated

The screen rule is not fussiness. AI cannot render your actual interface, so a generated screen is a *different product* than the one you sell — and viewers who install it feel the mismatch immediately. Record your own screen once, in one 3-minute session, and you have B-roll for all thirty.

The payoff beat — the last 1.5 seconds

Every clip ends on a payoff plate. Pick one of three:

- **P1 · BEHAVIOUR** — laptop closes, phone goes face-down, person walks out of frame. Zero compliance surface. Use as default.
- **P2 · LEDGER** — your real journal screen, entries accumulating, ticks stacking down the column. Shows momentum without showing money.
- **P3 · REAL ACCOUNT** — your own genuine account screen. ****Only if it is literally yours**, and captioned as your own result rather than a typical one. This is the only plate that shows money, and it must be real footage — a fabricated equity screen is the fastest way to lose an ad account, and it is the one frame viewers screenshot and pick apart.**

P1 and P2 are cleared for paid promotion. P3 is organic-only in most markets.

BGM — four beds, rotated

Music starts **already playing**. Never fade in from silence — a 1-second fade is 10% of the clip spent on nothing.

BED	TEMPO	CHARACTER	USE ON
LOW-PULSE	84 BPM	Sub-bass, sparse rim clicks, no melody	Confession / problem clips
LIFT	96 BPM	Muted piano, soft claps enter at 5.5s	Turnaround clips
STILL	72 BPM	One sustained pad, single bell at the payoff	Reflective clips
DRIVE	108 BPM	Filtered house loop, filter opens at 6.0s	Energy / offer clips

The rule that matters: whatever the bed, its lift lands at **6.0s**, on the payoff beat. Music arriving late is why a good clip feels flat.

SFX kit

CUE	SOUND	WHERE
UI-TAP	Soft mechanical click, 40ms	Every interface touch
REFUSE	Two-note descending pluck, low	The "no trade" moment
CONFIRM	Single upward pip	A check passing
WHOOSH	180ms air pass	Hard cuts only
PAPER	Page or pen	Journal beats
SUB	40Hz thump	Under the payoff plate
ROOM	Continuous room tone	Under all A-roll. Never let a frame be silent

Transition kit

	NAME	WHAT IT DOES
T1	WHIP	3-frame motion-blur pan. Direction must match where the subject looked
T2	MATCH-HAND	Cut on the hand moving. Exits frame right, enters frame right
T3	SCREEN-PUNCH	Push in 12% on the phone, cut to full-frame screen at matched scale
T4	FLASH	2-frame dip to white then black. Once per clip, maximum
T5	RAMP	Last 6 frames ramped 2×, landing on the next beat
T6	HOLD	Hard cut, no effect. The default — use it most

Four transitions in ten seconds reads as a template. Two reads as a film.

Infographic system — typed in post

	NAME	LOOK
IG- A	CHECK STRIP	Five pills across the lower third. Four tick, one crosses red. Animate in left→right, 60ms apart
IG- B	SWAP	Old behaviour strikes through, new behaviour types in beneath it
IG- C	RING	Countdown ring closing, for time and news beats
IG- D	RISK BAR	A horizontal bar visibly shrinking
IG- E	GRID	Month calendar, days filling one by one
IG- F	OFFER PLATE	7 days free · nothing charged until day 8 · GOLD10

House colours: near-black **#0A1214**, warm gold **#E0A63C** for passes, muted red **#C0453B** for the failed check. One accent per frame, never two.

Grade

A-roll: no grade. Leave the phone's own colour. A graded talking head reads as an advert within half a second and every conversion metric drops.

B-roll screen: +8 contrast, −5 saturation only. Enough to sit next to the A-roll without looking like a different camera.

The nine psychological closes, rotated

Repeating one close for thirty days trains people to skip the last two seconds. These rotate so the ending stays live:

Loss aversion · Social proof · Identity shift · Curiosity gap · Reciprocity · Contrast · Self-persuasion · Zeigarnik (open loop) · Scarcity

01 — "I stopped giving it back"

Arc: won on Monday, gave it all back by Thursday → now the week ends where it should **Close:** Loss aversion

Video build

A-ROLL — generate

[house realism block] A man in his early thirties with short dark hair and light stubble, wearing a plain grey t-shirt, sits on the edge of an unmade bed in a small apartment. A second phone rests in his left hand, screen glowing faintly upward onto his chin; he glances down at it once mid-sentence, thumb moving, then back up to the camera. Late evening, warm lamp light from behind him, cool blue window light on one cheek. He starts with a tired half-laugh, shakes his head slowly, then his face steadies into something calmer as he speaks. At the end he places the second phone face-down on the duvet beside him without looking at it, and holds eye contact with the lens.

B-ROLL

- B1** (generate) — Extreme close-up, same room, same light: a thumb dragging slowly down a phone screen held at a low angle, screen content out of focus and unreadable, warm lamp reflection sliding across the glass.
- B2** (capture — your real screen) — The XAU/USD checklist scrolling, five checks resolving, the last one landing red. Record at 60fps, screen-record the phone, not a simulator.
- B3** (generate) — A hand closing a laptop lid in near-dark, one soft click.

EDIT — 10.0s

T	SHOT	IN	SFX	OVERLAY
0.0–2.1	A-roll, the half-laugh	—	ROOM	—
2.1–3.3	B1 thumb on glass	T2 MATCH-HAND	ROOM + UI-TAP ×2	—
3.3–5.0	B2 real checklist, last check turns red	T3 SCREEN-PUNCH	REFUSE	IG-A CHECK STRIP builds L→R
5.0–6.6	A-roll, steadied	T6 HOLD	ROOM	—
6.6–8.3	B3 laptop closing	T5 RAMP	SUB on the click	IG-B SWAP: Monday: green × → the week ends green
8.3–10.0	Payoff — phone face-down on the duvet, hand withdraws, hold	T6 HOLD	ROOM tail	text card 3

BGM LOW-PULSE, lift at 6.0s under the laptop close · Payoff P1 · Grade house

VO (26 words): "I was good at winning on Monday. I was excellent at giving it back by Thursday. That stopped. Not because I got smarter — I got stopped."

Post text cards: Monday: green → Thursday: gone → Not anymore

- **YouTube description:** Winning early in the week and giving it back by Thursday is the most common pattern in retail gold trading — and it is not an entry problem. It is the absence of anything that tells you to stop. BullionEdge Pro runs a pre-trade checklist on XAU/USD and refuses to give you a verdict when conditions don't support one. Try the full desk free for 7 days → <https://bullionedgepro.github.io/bullionedge-pro/> · Not financial advice. Trading gold is high-risk and you can lose money.

02 — "It said no. I listened. That was the whole change."

Arc: the first time she obeyed a refusal → the trade she skipped went against her **Close:** Curiosity gap

Video build

A-ROLL — generate

[house realism block] A woman in her late twenties with dark curly hair tied back, wearing a hospital-scrubs top, sits in a parked car in a car park at dusk. Her phone is propped against the steering wheel filming her; a second phone is held flat in her palm below frame centre, its glow lighting her hands and the underside of her face. Overhead car-park lights flicker faintly across the windscreen behind her. She speaks quietly, like she is admitting something, looks down at the held phone on the middle line and gives it a small incredulous shake of the head, then looks straight back up with a disbelieving laugh on the final line.

B-ROLL

- **B1** (generate) — Top-down on her palm holding the phone, screen glow visible but content out of focus, car-park light strobing gently across it.
- **B2** (capture — your real screen) — The verdict card resolving to ****no trade****, with the failing check named underneath. Hold on it for a full second.

- **B3** (capture — your real screen) — The XAU/USD chart, one candle later,

moving hard against the direction she wanted. **Real chart footage only.**

- **B4** (generate) — Her hands going still on the steering wheel, engine off.

EDIT — 10.0s

T	SHOT	IN	SFX	OVERLAY
0.0– 2.0	A-roll, quiet admission	—	ROOM + faint car-park hum	—
2.0– 3.2	B1 phone in palm	T2 MATCH-HAND	UI-TAP	—
3.2– 4.6	B2 real verdict: no trade	T3 SCREEN-PUNCH	REFUSE	IG-A CHECK STRIP, one pill red

verdict on XAU/USD — and when the conditions don't line up, it returns no trade and shows you which check failed. Start free for 7 days → <https://bullionedgepro.github.io/bullionedge-pro/> · Not financial advice. Trading gold is high-risk and you can lose money.

03 — "Four trades a week. Not twenty."

Arc: overtrading → fewer, larger-conviction entries, account finally growing **Close:** Identity shift

Video build

A-ROLL — generate

[house realism block] A man in his forties, greying at the temples, wearing a plain navy polo, stands in a modest home kitchen holding a mug in one hand and a phone flat in the other at chest height, filming himself with a third device propped on a shelf so the angle is slightly upward. Morning light through a window behind the camera. He glances down at the phone in his hand, gives a single satisfied nod at whatever is on it, takes a small sip mid-sentence, and delivers the last line with flat matter-of-fact confidence rather than excitement, setting the phone down on the worktop.

B-ROLL

- **B1** (*generate*) — Kitchen worktop, morning light, a phone lying face-up beside a mug; a hand enters, taps once, withdraws.
- **B2** (*capture — your real screen*) — The journal view scrolled slowly: a week's worth of entries, most of them logged refusals rather than trades.
- **B3** (*generate*) — Wide shot of him leaving the kitchen, phone left behind on the worktop, mug in hand.

EDIT — 10.0s

T	SHOT	IN	SFX	OVERLAY
0.0– 2.3	A-roll, "twenty trades a week"	—	ROOM + kettle tick	IG-B SWAP begins: 20 on screen
2.3– 3.6	B1 tap on the worktop phone	T2 MATCH- HAND	UI-TAP	—
3.6– 5.4	B2 real journal, a week of entries	T3 SCREEN- PUNCH	PAPER ×3 soft	IG-E GRID: 7 days fill, only 4 marked
5.4– 6.9	A-roll, the sip and the nod	T6 HOLD	ROOM	IG-B SWAP resolves: 20 × → 4
6.9– 8.4	B2 continued, thumb stops scrolling	T6 HOLD	UI-TAP	—
8.4– 10.0	Payoff — B3 he walks out, phone stays behind	T5 RAMP	SUB	text card 3

- **YouTube title:** I Cut From 20 Trades a Week to 4 #XAUUSD #Overtrading #GoldTrading
- **YouTube description:** Overtrading is the most expensive habit in retail gold trading and the least discussed, because it never feels like a mistake in the moment — each individual entry seems defensible. BullionEdge Pro grades every XAU/USD setup against trend, structure, volatility and session before you commit, which makes the marginal ones visible as a group. Try it free for 7 days → <https://bullionedgepro.github.io/bullionedge-pro/> · Not financial advice. Trading gold is high-risk and you can lose money.

04 — "My wife noticed before I did"

Arc: the change showed up in his mood before it showed up in the account Close: Social proof

Video build

A-ROLL — generate

[house realism block] A man in his mid-thirties with a beard, wearing a creased button-down with the sleeves rolled, sits on a sofa in a living room with a child's toy visible on the floor behind him. Warm evening lamp light. He holds the filming phone slightly below eye level, leaning forward with elbows on knees; a second phone lies face-down on the sofa cushion beside his thigh, deliberately untouched throughout. He smiles genuinely partway through, a real smile that reaches the eyes, glances briefly at the face-down phone without picking it up, and finishes with a small nod.

B-ROLL

- B1** (generate) — A family dinner table from chest height, two plates, a phone face-down beside a fork. Nobody reaches for it. Warm overhead light.
- B2** (generate) — Early morning, same man at a kitchen table alone, phone in hand, focused, before anyone else is up.
- B3** (capture — your real screen) — The checklist completing, plan written, then the screen going dark as it locks.

EDIT — 10.0s

T	SHOT	IN	SFX	OVERLAY
0.0–2.2	A-roll, "my wife noticed first"	—	ROOM + faint TV murmur	—
2.2–3.8	B1 dinner table, phone face-down	T6 HOLD	cutlery, quiet talk	text card 2
3.8–5.3	B2 morning, phone in hand, focused	T4 FLASH (the only one in this clip)	ROOM shift	—
5.3–6.7	B3 real screen: plan written, screen locks	T3 SCREEN-PUNCH	CONFIRM then UI-TAP	IG-A CHECK STRIP, all pass
6.7–8.5	A-roll, the genuine smile	T6 HOLD	ROOM	—
8.5–10.0	Payoff — back to B1 , phone still face-down, hand reaches past it for a glass	T5 RAMP	SUB	text card 3

BGM STILL, single bell at 6.0s on the screen lock · Payoff P1 · Grade house

VO (26 words): "My wife noticed first. Said I stopped checking my phone at dinner. The account followed about a month later. In that order. Not the other way."

Post text cards: `she noticed first` → `phone stayed down at dinner` → `the account followed`

Captions

- **TikTok:** she clocked it before the account did 🤖 <https://bullionedgepro.github.io/bullionedge-pro/>

`#tradingpsychology #xauusd #goldtrader`
- **Facebook:** Ask anyone who lives with a trader — they know how the week went before you say a word. BullionEdge Pro takes the decisions out of the moment and puts them in a checklist you run *before* the market opens. Free 7 days: <https://bullionedgepro.github.io/bullionedge-pro/>
`#TradingPsychology #GoldTrading #XAUUSD`
- **YouTube title:** My Wife Noticed I Changed Before My Account Did #TradingPsychology #XAUUSD #GoldTrading
- **YouTube description:** The behavioural change comes before the account change, and almost nobody talks about it because it doesn't screenshot well. BullionEdge Pro moves the decision out of the live moment: you run a pre-trade checklist on XAU/USD, get a graded verdict with the reasoning shown, and log the outcome — so the emotion has somewhere to go that isn't the entry button. Start free for 7 days → <https://bullionedgepro.github.io/bullionedge-pro/> · Not financial advice. Trading gold is high-risk and you can lose money.

05 — "I was sizing on feelings"

Arc: random lot sizes → calculated risk → drawdowns became survivable **Close:** Contrast

Video build

A-ROLL — generate

[house realism block] A woman in her early thirties with straight black hair, wearing a beige knit jumper, sits at a small desk in a bedroom corner with a closed laptop beside her. She holds the filming phone in one hand at a slight angle so the framing is a little off-centre and imperfect, and a second phone in the other, thumb tapping numbers into it as she talks. Soft grey daylight from a window to her left. She speaks with a wry, self-aware tone, raises her eyebrows once on the middle line, turns the second phone briefly toward the lens without holding it still long enough to read, and ends completely still.

B-ROLL

- **B1** (*generate*) — Close on her hand, thumb entering digits into a phone keypad-style field, screen content out of focus.

- **B2** (*capture — your real screen*) — The risk calculator: account balance, stop distance, risk percentage, and the lot size resolving to a single figure.
- **B3** (*generate*) — Her hand placing the phone down, screen dark, fingers flat.

EDIT — 10.0s

T	SHOT	IN	SFX	OVERLAY
0.0–2.4	A-roll, "by how confident I felt"	—	ROOM	—
2.4–3.5	B1 thumb entering numbers	T2 MATCH-HAND	UI-TAP ×3	—

- **YouTube title:** I Was Choosing Lot Size Based on Feelings **#RiskManagement #XAUUSD #GoldTrading**

- **YouTube description:** Confidence-based position sizing is the quietest account killer in retail trading: size peaks precisely when conviction peaks, which is precisely when you are most exposed to being wrong. BullionEdge Pro derives lot size for XAU/USD from account balance, stop distance and a fixed risk percentage, and flags trades where the calculated size is too small to justify the spread. Try it free for 7 days → <https://bullionedgepro.github.io/bullionedge-pro/> · Not financial advice. Trading gold is high-risk and you can lose money.

06 — "Two losses and it locks me out"

Arc: revenge-trading spirals → a hard stop after two losses → red days stayed small **Close:** Loss aversion

Video build

A-ROLL — generate

[house realism block] A young man in his mid-twenties with a fade haircut, wearing a black hoodie, sits at a cluttered desk in a dim room with a monitor glowing off-frame casting cool blue light on one side of his face. The filming phone is propped low, looking slightly up at him. He reaches off-frame toward the monitor twice, stops himself the second time, and pulls his hand back into his lap. He starts intense, jaw tight, then visibly releases tension as he speaks — shoulders dropping, head tipping back once — and ends with a quiet, almost relieved delivery, pushing the chair back from the desk.

B-ROLL

- **B1** (*generate*) — His hand hovering over a mouse, tightening, then lifting away. Blue monitor light, shallow focus, no screen content visible.
- **B2** (*capture — your real screen*) — The daily loss limit reached: the app refusing to produce a verdict, with the reason stated.
- **B3** (*generate*) — Same room, monitor now off. He stands and leaves frame; the chair rotates slightly and stops.

EDIT — 10.0s

T	SHOT	IN	SFX	OVERLAY
0.0– 2.2	A-roll, jaw tight, "a third, a fourth"	—	ROOM + fan hum	IG-C RING, two segments already burnt
2.2– 3.4	B1 hand tightening on the mouse	T2 MATCH-HAND	UI-TAP sharp	—
3.4– 5.2	B2 real screen: limit reached, refused	T3 SCREEN-PUNCH	REFUSE	IG-C RING completes and locks red
5.2– 6.6	B1 reverse — the hand pulling away	T6 HOLD	silence for 4 frames, then ROOM	text card 3
6.6– 8.3	A-roll, shoulders dropping	T6 HOLD	ROOM	—
8.3– 10.0	Payoff — B3 monitor off, he leaves, chair settles	T5 RAMP	SUB	—

BGM LOW-PULSE. Cut the bed to silence at 5.2s for four frames, then bring it back with the lift at 6.0s — the hole is the whole clip · **Payoff** P1 · **Grade** house

VO (26 words): "Two losses used to mean a third, a fourth, a very bad night. Now two losses means the day is over. My red days got small."

07 — "I was trading at the worst hour of the day"

Arc: trading whenever he was free → matching his hours to gold's actual sessions Close: Self-persuasion

Video build

A-ROLL — generate

[house realism block] A man in his late twenties in a delivery-driver's high-vis vest, sitting in the cab of a parked van, holding the filming phone up in one hand and a second phone braced against the steering wheel, which he taps twice with his free hand. Late afternoon sun through the windscreen creating harsh natural contrast across his face. Street visible but out of focus behind him. He speaks quickly and directly like he only has a minute, points at the camera once on the middle line, glances at the braced phone, and finishes with a decisive nod.

B-ROLL

- B1** (generate) — Dashboard clock and a phone side by side on the van's dash, sunlight crossing both, no readable digits.
- B2** (capture — your real screen) — The session view: the London/New York overlap highlighted against local time, with the current hour marked.
- B3** (generate) — Timelapse through the windscreen, same parked street, afternoon light sliding to dusk to lit streetlamps, roughly 2 seconds.

EDIT — 10.0s

T	SHOT	IN	SFX	OVERLAY
0.0–2.0	A-roll, "what hour do you actually trade"	—	ROOM + distant traffic	text card 1 as a question
2.0–3.0	B1 clock and phone on the dash	T6 HOLD	UI-TAP	—
3.0–4.6	B2 real session view, current hour marked	T3 SCREEN-PUNCH	CONFIRM	IG-C RING marking the live window

08 — "It told me a news event was eight minutes away"

Arc: repeatedly stopped out by scheduled news → blackout windows → survivable weeks **Close:** Zeigarnik (open loop)

Video build

A-ROLL — generate

[house realism block] A woman in her forties with shoulder-length brown hair and glasses, wearing a plain cardigan, stands in a small home office with a bookshelf behind her. She holds the filming phone slightly too close, so the framing is a bit tight on her face — a real amateur framing choice — and a second phone in her lower hand which she raises into frame briefly, screen toward herself, then lowers. Flat overcast daylight. She speaks with dry humour, pauses meaningfully before the last sentence, and ends mid-thought as though she has more to say, already turning away.

B-ROLL

50 U `B1` (capture — your real screen) — The news blackout notice: minutes to the

release counting down, entry blocked, the event named.

- **B2** (*capture — your real screen*) — The XAU/USD chart across the release: a long wick in both directions inside one candle. **Real chart footage.**
- **B3** (*generate*) — Her thumb hovering over a phone screen and then not pressing — held for a full beat, then withdrawing.

EDIT — 10.0s

T	SHOT	IN	SFX	OVERLAY
0.0– 1.8	A-roll, "eight minutes to a news release"	—	ROOM	IG-C RING starts closing, top-right
1.8– 3.4	B1 real blackout notice	T3 SCREEN-PUNCH	REFUSE	IG-C RING continues over the plate
3.4– 4.8	B3 thumb hovering, not pressing	T2 MATCH-HAND	four frames of silence	text card 2
4.8– 6.2	A-roll, the pause	T6 HOLD	ROOM	—
6.2– 8.4	B2 real chart, the wick both ways	T4 FLASH (<i>the only one here</i>)	SUB + low rumble	IG-C RING hits zero and vanishes
8.4– 10.0	Payoff — A-roll, ends mid-thought, turning away	T6 HOLD	ROOM tail	text card 3

BGM STILL — hold the pad flat through the blackout, drop the bell at 6.2s on the wick. Do not lift the music; the point is that nothing happened to her · **Payoff** P1 · **Grade** house

VO (24 words): "Eight minutes to a news release and I was about to enter. It told me. I didn't. That's why I still pay for it."

Post text cards: **8 minutes to news** → **I was about to enter** → **I didn't**

Try it free for 7 days → <https://bullionedgepro.github.io/bullionedge-pro/> · Not financial advice. Trading gold is high-risk and you can lose money.

10 — "The journal found the leak"

Arc: couldn't see why she lost → logged everything → one repeated mistake, visible **Close**: Curiosity gap

Video build

A-ROLL — generate

[house realism block] A woman in her thirties with braided hair, wearing a university hoodie, sits at a kitchen table with a notebook, a cold cup of tea and a phone lying face-up in front of her. The filming phone leans against something so the shot is static and slightly crooked. Bright midday light from a window to the right, one side of her face brighter. She talks with her hands, taps the notebook once, drags the face-up phone toward herself and scrolls it briefly, then finishes leaning back with a knowing look.

B-ROLL

- B1** (generate) — Top-down on the notebook: a hand writing a short line, then circling something already written. Handwriting deliberately illegible.
- B2** (capture — your real screen) — The journal list scrolled slowly through a dozen entries, then stopping and holding on one repeated failing check.
- B3** (generate) — She pushes the notebook away and sits back, both hands flat on the table.

EDIT — 10.0s

T	SHOT	IN	SFX	OVERLAY
0.0–2.2	A-roll, "I didn't have twelve problems"	—	ROOM + kitchen hum	IG-E GRID: 12 cells appear, scattered
2.2–3.5	B1 hand circling the notebook	T2 MATCH-HAND	PAPER	—
3.5–5.6	B2 real journal scrolling, then stopping	T3 SCREEN-PUNCH	UI-TAP ×4 then stop	—
5.6–6.8	B2 held on the one repeated failure	T6 HOLD	four frames of silence, then SUB	IG-E GRID resolves: all 12 cells snap to the same colour
6.8–8.4	A-roll, the knowing look	T6 HOLD	ROOM	text card 2
8.4–10.0	Payoff — B3 notebook pushed away, hands flat	T5 RAMP	ROOM tail	text card 3

BGM STILL, bell at 6.0s as the grid snaps · **Payoff** P2 LEDGER · **Grade** house

VO (23 words): "I didn't have twelve problems. I had one problem, twelve times. I could not see it until something wrote it down for me."

Post text cards: 12 problems? → no – 1 problem, 12 times → the journal found it

15 — "I check before I copy anyone now"

Arc: copy-trading blindly → evaluating the account first → stopped inheriting other people's risk **Close:** Loss aversion

Video build

A-ROLL — generate

[house realism block] A young woman in her early twenties with long dark hair, wearing a café uniform apron, standing in a staff back room with shelves and boxes behind her, holding the filming phone up quickly like she is on a break and a second phone in her other hand which she turns briefly toward the lens and pulls back before it can be read. Fluorescent overhead light, slightly unflattering and very real. She speaks fast and conspiratorially, glances off to the side once as if checking nobody is listening, then delivers the last line straight to camera and pockets the second phone.

B-ROLL

- **B1** (*generate*) — A smooth rising line on an out-of-focus screen, seen at an angle through a hand, deliberately unreadable — impression only, no figures.
- **B2** (*capture — your real screen*) — The copy-trade evaluation: the drawdown and risk profile of an account laid out beside its curve.
- **B3** (*generate*) — Her apron pocket, the phone sliding in, hand withdrawing.

T	SHOT	IN	SFX	OVERLAY
0.0– 2.2	A-roll, "a beautiful looking account"	—	ROOM + café clatter through a door	—
2.2– 3.6	B1 the smooth rising line, out of focus	T6 HOLD	UI-TAP	IG-D RISK BAR appears empty and calm

24 — "It can't place a trade. That's why I trust it."

Arc: burned by tools that touched his account → one that structurally cannot → trusted the output **Close:** Contrast

Video build

A-ROLL — generate

[house realism block] A man in his fifties with weathered features, wearing a flat cap and a waxed jacket, standing outdoors on a footpath with hedgerow behind him, holding the filming phone in one hand against a light breeze and a second phone held up flat in the other, screen toward the sky, which he taps twice and then pockets decisively mid-sentence. Bright flat daylight with wind moving his collar. He speaks bluntly and plainly, points at the lens once on the last line, and finishes with a firm closed expression.

B-ROLL

- B1** (capture — your real screen) — The settings or connections view showing there is no broker connection and no account link — nothing to connect.
- B2** (generate) — His weathered hand pushing the phone down into a deep jacket pocket, wind moving the fabric.
- B3** (generate) — Wide, from behind: him walking away down the footpath, hedgerow both sides, phone away, unhurried.

EDIT — 10.0s

T	SHOT	IN	SFX	OVERLAY
0.0–2.2	A-roll, "it can't touch my account"	—	ROOM + wind + birds	—
2.2–4.2	B1 real settings: no connection, nothing linked	T3 SCREEN-PUNCH	UI-TAP then a flat, dry beat	IG-A CHECK STRIP, but with the execution pill greyed out entirely
4.2–5.6	A-roll, blunt delivery	T6 HOLD	wind	text card 2
5.6–7.0	B2 phone into the jacket pocket	T2 MATCH-HAND	fabric + SUB	IG-B SWAP: <i>it trades for you</i> ✕ → <i>it can't</i>
7.0–8.4	A-roll, the point at the lens	T6 HOLD	ROOM	text card 3
8.4–10.0	Payoff — B3 walking away down the path	T5 RAMP	wind tail	—

BGM STILL — almost none. This clip's authority comes from how plain it is; a bed with any lift undercuts it. One bell at 5.6s and nothing else · **Payoff P1** · **Grade** house

VO (25 words): "It can't touch my account. It can't place a trade. It never sees my money. That is exactly why I believe what it tells me."

BullionEdge Pro grades XAU/USD structure — including

30 — "Seven days. Nothing charged. Just look."

Arc: the closer — direct, low-friction, hands the decision back

Close: Reciprocity + Scarcity (the strongest ending, saved for last)

Video build

A-ROLL — generate

[house realism block] A woman in her thirties with shoulder-length brown hair, wearing a simple dark top, sitting in a bright ordinary living room on a sofa, holding the filming phone at arm's length at eye level so the framing is clean and direct. A second phone rests in her lap, screen up; she picks it up on the last line and turns it toward the lens, offering it rather than showing off. Soft natural daylight from a large window. She speaks warmly and simply, like she is recommending something to a friend rather than selling, shrugs lightly on the middle line, and finishes with a genuine open smile held for a full second.

B-ROLL

- **B1** (capture — your real screen) — The landing page, the trial ribbon visible, then the plan card with the trial badge on it.
- **B2** (capture — your real screen) — The checkout showing the trial terms — nothing charged today — captured live, not mocked up.
- **B3** (capture — your real screen) — A **no trade** verdict, held for a full beat. The last thing the viewer sees the product do is refuse.

EDIT — 10.0s

T	SHOT	IN	SFX	OVERLAY
0.0– 2.0	A-roll, "seven days, nothing charged"	—	ROOM	IG-F OFFER PLATE, lower third, subtle
2.0– 3.4	B1 real landing page, trial badge	T3 SCREEN-PUNCH	UI-TAP	—
3.4– 4.8	B2 real checkout, nothing charged today	T6 HOLD	CONFIRM	IG-F OFFER PLATE: <i>nothing until day 8</i>
4.8– 6.4	A-roll, the light shrug	T6 HOLD	ROOM	text card 2
6.4– 7.9	B3 real no trade verdict, held	T3 SCREEN-PUNCH	REFUSE	IG-A CHECK STRIP, one pill red
7.9– 10.0	Payoff — A-roll turning the phone toward the lens, open smile held	T2 MATCH-HAND	SUB then ROOM tail	IG-F OFFER PLATE full: <i>7 days free · nothing until day 8 · GOLD10 for 10% off</i>

BGM DRIVE, filter fully open from 6.4s and running to the end — this is the one clip allowed to finish loud · **Payoff** P3 permitted here if you use your own real account footage; otherwise P1 · **Grade** house

Note on the ending: the last product frame is a **refusal**, not a win. It is counter-intuitive and it is the highest-converting frame in the set — the offer lands immediately after proof that the tool will tell you no, which is the exact opposite of what every competing ad does in its final second.

VO (25 words): "Seven days, nothing charged, the whole thing. If it tells you not to trade for a week — that's the product working. Go look for yourself."

Post text cards: 7 days free → nothing charged → go look

Running the campaign

Order matters more than the clips

Don't post these 1 to 30. Sequence by **who they're aimed at**:

WEEK	CLIPS	AIMED AT
1 — <i>Recognition</i>	01, 03, 06, 10, 21, 27, 05	People who know something is wrong and can't name it
2 — <i>Mechanism</i>	02, 07, 08, 11, 14, 22, 29	People who now want to know what fixes it
3 — <i>Objection</i>	09, 15, 17, 20, 24, 26, 16	People who nearly buy and then don't
4 — <i>Proof and close</i>	04, 12, 13, 18, 19, 23, 25, 28, 30	People who need to believe it's possible for them

The recognition clips get the reach. The objection clips get the sales. Posting week 4 first is the most common way a campaign like this dies with good views and no subscribers.

Posting

- **1 per day**, same window each day. TikTok and Reels first, then Facebook, then YouTube Shorts.
- **YouTube Shorts:** the title carries the hashtags; put the link on the **first line** of the description, above the fold.
- **Instagram:** link goes in bio — captions say "link in bio" but the descriptions above still include the URL for Facebook cross-post and for anyone who copies the caption.
- **Pin three:** 01, 17, 30. Problem, differentiation, offer. That trio is a complete pitch for anyone who lands on the profile cold.

When one takes off

Do not post a different clip. Post the **same** clip's sibling — reshoot it with a different cast and setting, same script. An angle that works is a discovered audience, not a lucky day, and the algorithm will keep serving that audience for about 72 hours.

The two lines you never cross

1. **No profit claim.** No figures, no percentages, no P/L screens, not even in a reply to a comment. One comment saying "made 4k last month" undoes thirty compliant videos.
2. **No generated text in frame.** Every word on screen is typed by you in post.
AI-rendered letterforms on a finance video read as a scam in one frame, and viewers cannot articulate why they distrusted it — they just scroll.

The disclaimer

Every YouTube description above ends with it. For TikTok, Instagram and Facebook, put it in the **first pinned comment**, not the caption — it protects you identically and doesn't eat the hook:

Not financial advice. Trading gold is high-risk and you can lose money.
